

Our Health & Safety Policy

We believe

- Accidents are preventable
- Health, Safety & Wellbeing is an integral part of everything we do
- Our business culture promotes everyone to report any issues or stop work on any job that they believe is unsafe or cannot be completed in a safe manner
- Collaboration between all stakeholders leads to a safer working environment

To achieve this, we will

- Ensure our commitment to health and safety is highly visible
- Ensure health and safety is considered in all aspects of our operations and at all stages of the design and construction processes
- Encourage our contractors to demonstrate excellence in health and safety management
- Implement risk management practices to control and reduce the potential risks in all our operations
- Actively promote worker participation in our health and safety system
- Evaluate, recognise and celebrate the health and safety performance of our workers.
- Ensure there is ongoing consultation with workers to ensure that they have the training, knowledge, skills and resources to maintain a healthy and safe workplace
- Set targets to drive continuous improvement of our health and safety performance through collaboration with all stakeholders
- Remain focused on providing and supporting an environment where all safety events are reported and investigated to ensure that lessons are learnt and shared to prevent recurrence
- Support a culture where all workers can return to work following an injury or illness
- Comply with all applicable regulatory and industry standards, good practice guidance and keep up to date with any changes.
